

ONGC PUBLIC SCHOOL NERAVY - KARAIKAL

The CBSE Capacity Building Program was held at ONGC Public School campus on **May 27, 2025**, focusing on **"Use of AI in Classroom"** with Tmt. Sudhamalini S and Tmt. Shanmugavalli V as resource persons. This one-day orientation for teachers highlights the importance of integrating AI in educational settings.

The program sounds comprehensive, covering various AI tools and apps. Here's a possible expansion:

"The program provided teachers with a thorough understanding of AI integration in education, including:

ChatGPT: AI-powered conversational tool for student engagement

OpenAI: Exploring possibilities for educational content creation

Moodle: Learning management system for online courses

Canva: Graphic design tool for educational resources

This hands-on experience will likely enhance teachers' ability to create engaging, technology-driven lessons."

The school management's efforts in providing facilities for the CBSE Capacity Building Program on "Use of AI in Classroom" are commendable. By investing in infrastructure and resources, they've enabled teachers to gain valuable skills in integrating AI tools like ChatGPT, OpenAI, Moodle, and Canva

into their teaching practices. This initiative will likely have a positive impact on the school's educational environment and student outcomes.
